

SEEZAM

THE 100% SAFE FORTRESS FOR YOUR SENSITIVE INFORMATION

- How do you secure your confidential information from falling into malicious hands?
- How do you make sure secret content stays secret when being shared with authorized third parties?
- How do you send your clients confidential information with maximum security at minimum cost?

The solution is an electronic safe, providing you a virtual secured and inviolable storage space and guaranteeing that the sensitive information deposited is restored to you intact. Systemat presents the professional solution SeeZam, an innovative online service: the eVault. A first in its field, this service for businesses and organizations meets the growing security requirements for preserving and sharing secret content.

FEATURES FOR YOUR BUSINESS

- Private space for the deposit, protection and secure sharing of any type of electronic format.
- Maximum security and inviolability thanks to strong authentication, military-level data encryption and the guarantee of our inability as provider to access information from your eVault.
- Highly confidential sharing
- A fully customizable service answering your specific needs!
- Automation of safe deposits
- Emergency opening procedure supporting your DRP/BCP.

INFINITE POSSIBLE USES IN YOUR ORGANIZATION

- Businesses: Share confidential documents between businesses and their suppliers, clients or employees.
- Boards of Directors: Share meeting minutes or highly confidential information among board members.
- Insurance: Provide your policyholders with eVaults to store policy information, preventive inventories of property, documents in case of loss, etc.
- Banks: Account statements, tax return documents, exchanges in the context of Private Banking, etc.
- Health Care: Go paperless and provide your patients with medical reports at lower cost.
- Finance: Store the documents required for internal/external audit.
- HR: Go paperless and provide employee pay slips and evaluations, with guaranteed ROI and employee service that stands out.

SEEZAM'S ADVANTAGES

- An ultra-secure digital fortress made in Luxembourg
SeeZam is hosted exclusively in the Grand Duchy of Luxembourg, an EEC-recognized Data Center with a unique legal environment that allows unlimited encryption levels and authorizes the eVault supplier not to hold a skeleton key or a copy of its clients' keys. This legal environment, unique in Europe and beyond its borders, allows SeeZam to offer the highest levels of security and confidentiality.
- Anywhere, anytime
You have access to your virtual safe at any time, anywhere in the world via any device that has an Internet connection.
- Simplicity and ergonomics
You will be won over by SeeZam's highly intuitive interface.
- Stimulates the development of your customer relationship
All of your clients' confidential documents are preserved; your clients connect with each other regularly. Each connection is qualified with your client, promoting their loyalty.

- A competitive advantage for your business
Stand out from the competition and bring in new clients by providing them with this innovative platform for sharing confidential information with you.
- Rapid return on investment
Optimize your costs thanks to a fixed, clear and predictable budget for SeeZam's professional solutions, with a reduction in associated administrative costs (paper, envelopes, stamps, document processing time, etc.).
- Reduce your environmental footprint
SeeZam encourages your efforts to go paperless for your confidential documents towards your employees, suppliers or clients, thereby supporting your Green IT policy.

A UNIQUE SOLUTION

- First in its field
- Developed by security experts, with the benefit of the entire infrastructure of Systemat Group
- 100% security and confidentiality thanks to Luxembourg's legal framework and hosting
- User-friendly interface that also factors in the end user's requirements
- Options for highly secure, automatic and reliable sharing
- Integration and customization according to your business needs.
